PROJECTS

Basket grocery shopping site

- Developed a full-fledged online grocery shopping platform using HTML, CSS, JavaScript, PHP, and MySQL. Showcased proficiency in website development.

Resume builder site

- Crafted a Resume Builder website using React and Node.js, demonstrating competencies in these technologies to create a functional and user-friendly platform.

Magnet Fashion

- Created a website enabling user authentication, registration, and facilitating online clothing purchases.

Maven Java Project

- Set up a Maven Java project by cloning a "hello world" project from GitHub. Configured distribution management to employ Nexus as the artifact repository. Utilized Maven commands to build, test, and package the project.

CI / CD using Jenkins

- Established a Jenkins server on AWS Ubuntu, configured continuous integration and deployment via a freestyle project. Automated build using Git integration, Maven compilation, and packaging into a WAR file.
